

UDOT 2013 ROAD CONSTRUCTION GUIDE

This guide includes a list of the 10 most significant UDOT projects. For the most up-to-date details regarding these and other UDOT projects, visit udot.utah.gov or download the [UDOT Traffic app](#). Please note the information is subject to change.

- 1 I-80 Drainage Pipe Replacement, Salt Lake County**
Crews will install new drainage pipe in Parleys Canyon to replace the existing system. Drivers should expect lane closures throughout the summer. Project completion is estimated for December 2013.
- 2 I-15, South Payson Interchange to Spanish Fork River**
This summer, crews will work to widen seven miles of pavement and bridges on I-15 from the South Payson Interchange to the Spanish Fork River. Most of the work will take place in the freeway median, and construction is expected to be completed by the end of the year.
- 3 Southern Parkway, St. George**
The Southern Parkway is a 33-mile project that will eventually become an eastern belt route for Washington County. Currently, eight miles are complete from I-15 to the new St. George airport. Construction continues this spring and summer to extend the new highway another eight miles.
- 4 S.R. 193, Davis County**
Crews are extending state Road 193, the Bernard Fisher Highway, from 2000 West (S.R. 108) on 200 South in West Point to 700 South and State Street (S.R. 126) in Clearfield. Work scheduled this spring and summer includes earthwork, utility relocations, drainage and sound wall construction. Temporary road closures or blockages may happen from time to time on local streets and trails.
- 5 I-15, St. George Boulevard DDI Interchange Reconfiguration**
Reconstruction work will take place on the existing diamond interchange to install southern Utah's first diverging diamond interchange. Work is expected to begin this summer and finish by the end of the year.
- 6 U.S. 89/91 Repaving, Sardine Summit to S.R. 23, Cache County**
The second phase of work continues from last season's repaving of U.S. Highway 89/91. Maintenance work will take place from Sardine Summit to Wellsville to maintain a smooth road surface and prolong the life of the roadway. Daytime lane closures will be taking place throughout the summer.
- 7 I-15, 1100 South (U.S. 91) DDI Interchange, Brigham City**
Work to build the first diverging diamond interchange in northern Utah will begin this summer on the I-15 and 1100 South interchange in Brigham City. Traffic may be redirected around the project throughout its duration, but crews will work to minimize delays. This project is expected to be complete next summer.
- 8 U.S. 89 Improvements, Orem to Pleasant Grove**
Crews will make several improvements to State Street between Orem and Pleasant Grove this summer. The road will be widened to seven lanes, repaved with new asphalt, and upgraded with curb, gutter and new sidewalks in various locations. The project will improve traffic flow and reduce congestion in the area. Drivers should expect minor traffic delays due to lane restrictions.
- 9 Bangerter Highway, 13400 South CFI Installation, Salt Lake County**
Construction of a new continuous flow intersection (CFI) on Bangerter Highway at 13400 South will improve the flow of traffic in this fast-growing section of the Salt Lake Valley. Lane restrictions will occur throughout the project but will take place during non-commute and nighttime hours. Construction will be completed this year.
- 10 I-215 Maintenance, S.R. 201 to North Temple, Salt Lake City**
A heavily traveled section of I-215 will undergo concrete repair this summer for approximately two months with occasional lane and ramp closures. Work will take place during overnight and non-commute hours to minimize delays.
